(57) Abstract:

PURPOSE: To improve operability in the case of selecting the program of character broadcasting by executing correspondent program display when the display contents of characters displayed at a display position designated by a display position input means correspond to a program number.

CONSTITUTION: TV radio waves desired to be received are tuned by a tuner 2, and signals for character broadcasting superimposed on 14H (H:horizontal period)-16H and 21H in the vertical flyback periods of outputted intermediate video frequency signals are sampled by a sampling circuit 3 and stored in a RAM 5 as display code data after correcting error at an error correction circuit 4. A controller 9 stores data for display in a memory 6 for display by referring to the display code data in the RAM 5 and a character memory 8 and displays pictures on a display 7. The controller 9 detects the coordinates of a mouse as a pointing device 10 and decides an executing processing from the obtained coordinate of the mouse. When the display contents correspond to the program number of a certain program, the controller 9 displays the correspondent

program.
